Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

Introduction

Technical Data

Model	VWP-1K3S072BSFE0	VWP-860S072BSFE0
Input Rating	100-240V~, 50-60Hz, 13A	100-240V~, 50-60Hz, 9A
Output	86.4V === 15A	86.4V === 10A

Model	VWP-1K3S072BSFE1	VWP-860S072BSFE1
Input Rating	200-240V~, 50-60Hz, 7.5A	200-240V~, 50-60Hz, 5A
Output	86.4V === 15A	86.4V === 10A

Operation

- Connect the vehicle or battery first, then the power supply when charging.
- Do not touch the shell of the charger during charging to prevent burns, while the charger will become slightly heated.
- Recommend to place the charger with its fan facing upwards and there is no obstructions within 10cm of its surroundings during charging process, to ensure proper ventilation of the charger.
- Disconnect the power supply in time after the charging is completed. Do not leave the charger connected to the power supply for a long time when not charging.
- If the indicator light is abnormal or an unusual odor appears during the charging process, stop charging immediately and contact the after-sales service for inspection or replacement of the charger.
- Do not charging near fires, where temperature is extremely high.
- Do not charge battery immediately after using. Wait until it is cooled before Charging.

Charger Indicator

Charging State	LED Indicator
Charging < 80%	Flashing red light
Charging >= 80%	Flashing yellow light
Full Charging	Flashing green light
Standby	No light on

Correct Disposal of this product

This marking indicates that this product should not be disposed with other household wastes throughout the EU. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environmental safe recycling.
